## Types Of Scissors

**RC-Regular Cut**  
Both cutting edges  
are evenly sharp.

**SC-Super Cut**  
The razor sharp cutting edge on first  
blade cuts effortlessly and softly  
through thicker material. The  
serrated cutting edge on the  
second blade prevents slipping  
from tissue and sutures.

**TC-Tungsten Carbide**  
Tungsten carbide is incorporated  
into the blades which enables a  
precise and gentle incision, as  
well as long lifespan.

**TiN-Black Titanium Nitride Coating**  
Applied as a thin coating, TiN is  
used to harden and protect cutting  
and sliding surfaces. "Super Cut

- Aluminium - Orange

- **3020-10SL** ml 1.8 EU
- 3020-12SL** ml 1.8 AM
- Aluminium - Silver

### Advantages of intraligamental anesthesia:

- Automatic limitation of the power pressure.
- No numbness of the tongue, lips or cheek.
- Anesthetizing of a single tooth.
- Supports regional block anesthesia.
- Simultaneous treatment of teeth in different quadrants.
- Lower emotional impact on patient.
- Eliminates the risk of haematoma.

### Aspirating Syringes - Stainless Steel
